H-151 HE SERIES™

HIGH EFFICIENCY SYSTEM

The H151 HE System is User Friendly and Reliable.

- Modular Design
- Non-Corrosive Valve Body & Internals
- One Piece Stack Assembly
- Piston Operated
- Disassemble and Reassemble in Minutes
- Upflow Proportional Brining for Single and Twin Alt Systems
- High Salt Efficiency/Low Chloride Discharge

Water Reclaim – The H151 HE standard electronic package is capable of reclaiming much of the water used to regenerate the water softener and re-use that water to flush toilets. This water is typically soft and is free of the salt/brine discharge which is diverted to your standard drain/waste system. A water reclaim kit is required for this option.
